

Dear Valued Clients & Healthcare Professionals,

As one of your medical equipment providers, we at Stride Mobility feels it is important to take some precautionary measures and provide you with some additional information regarding our operation during this COVID-19 time.

While Stride Mobility is operating as normal, we are monitoring the situation closely in compliance with CDC mandates and have adopted precautionary measures to limit exposure:

1. We are disinfecting our showroom, warehouse, office and vehicles several times a day.
2. We are available by phone (419) 616-6017 or on the internet @ www.stridemobility.net
3. Our ATP Professionals are also available by phone and will work with you to conduct virtual visits to provide the care needed for our clients and to ensure the safety of all clients, therapists and healthcare staff.
4. We have asked our staff and are asking clients if you feel unwell, have flu-like symptoms, have been in contact with anyone sick or unwell, or if you have traveled or been in contact with anyone who has traveled abroad in the past two weeks, please contact your physician and stay at home.

Thank you very much for your support as we work through these complex decisions.

This is a time for us to come together as a team to meet the demands of our patients, our families and our community.

Mark Schnieders,
President & CEO
Stride Mobility
